Specifications															
Application	PCR	qPCR, fluorescence 96-well microplates only	qPCR & other fluorescent applications	PCR & sample storage	High temperature incubations & low temperature storage	Microplate sealing containing solvents incl. DMSO	Sample application or retrieval 96 well plates only		Sample application or retrieval 384 well plates only	Eukaryotic cell culture, bacterial culture and long-term live assays Suitable for use on plate readers	Bacterial or cell culture	Bacteria culture	Aqueous sample storage	Diagnostic kit production	Application
Special Properties	Good optical clarity	Discreet optical windows for 96-well plates	Good optical clarity	Irregular tearing when pierced prevents formation of vacuum	Strong adhesive	High solvent resistance	Cross-cut reduces tip or probe becoming clogged		Cross-cut reduces tip or probe becoming clogged	Gas permeable that allows air and CO ₂ exchange, but prevents moisture evaporation Optically clear	Very low moisture transfer rate Suitable for bacterial or cell culture	Thin gas permeable, moisture barrier seal Allows air and CO ₂ exchange, prevents evaporation	Medium strength transparent seal	Two sealing surfaces Optical windows	Special Properties
